Product: PRODUCT-DRIFTPACE

Walking construction

DriftPace is a walking shoe with a recycled mesh upper and rubber sole. Its catalog options are navy and white. The intended use is everyday walking; the product information does not prescribe a daily step count or therapeutic benefit.

Mesh cleaning

Remove loose dirt with a soft brush and wipe localized marks with a damp cloth and mild soap. Work gently around the seams. Do not bleach, machine wash or soak the complete shoe. Remove soap residue before allowing it to dry.

Keeping the pair dry

Loosen the laces after damp wear and leave the shoes in a ventilated room. Avoid radiators and hot-air dryers. Do not keep a damp pair inside a sealed bag; allow the lining to dry fully before storage.

Fit and recycled-material wording

Try both shoes indoors with everyday socks and check heel movement and forefoot pressure. Recycled mesh describes the upper material, not a verified percentage of the entire shoe. No model-specific width chart is provided.
