# FlowMark | Product and care guide

flowmark-guide | Version 1 | Applies in: DE, FR
Effective 2026-10-09 | English | Fictional training publication
Product: PRODUCT-FLOWMARK

## Walking collection

FlowMark is a walking shoe with a textile upper and rubber sole. Navy and white are catalog options. The published description supports everyday walking; it does not assign a daily distance target or a guaranteed standing-time benefit.

## Upper cleaning

Remove dry dirt using a soft brush, then clean localized marks with a damp cloth and mild soap. Work gently rather than saturating the textile. Remove soap residue. Do not machine wash, bleach or soak the assembled shoe.

## Lacing and drying

Untie the laces before removing the shoe so the heel is not repeatedly folded. If laces need cleaning, hand wash them separately. Let all parts dry at room temperature before storage; avoid tumble dryers and heated racks.

## Fit information

Check both feet in the shoes while standing and walking indoors. This guide contains no extra-wide designation or internal-length table. If the forefoot feels compressed, the textile material does not guarantee that wear will create enough room.
