TerraFlow Trail | Product scope and care

terraflow-guide | Version 2 | Applies in: DE, FR
Effective 2026-10-09 | English | Fictional training publication
Product: PRODUCT-TERRAFLOW-TRAIL

Classification matters

TerraFlow Trail is classified as lifestyle footwear in this synthetic catalogue, despite the word Trail in its name. It has a synthetic upper and rubber sole. No technical trail-running, hiking or protective-footwear certification is declared.

Cleaning after outdoor use

Allow loose mud to dry, then remove it with a soft brush. Wipe remaining marks with a damp cloth and mild soap. Do not machine wash, immerse or expose the shoe to direct drying heat. Let it dry fully before storage.

Performance boundaries

No waterproof rating, quantified lug depth or tested mountain-terrain suitability is published. Do not turn a product name or a rubber-sole description into a guarantee for hiking, ice or slippery rock.

Purchase and return context

Consult the current market listing for available variants and price. Outdoor use can affect eligibility under a voluntary unworn-item return policy; the applicable market policy and the actual condition of the item must be considered. This product guide does not decide an individual return claim.
