Product: PRODUCT-WAVETRACK

Road-running use

WaveTrack has a synthetic upper and rubber sole and belongs to the running collection. Black and white are the catalog colors. The name does not identify a mechanical wave plate; construction details beyond the listed materials are not supplied.

Panel cleaning

Wipe the upper using a soft cloth, water and mild soap. Clean visible dirt off before it dries into seams. Avoid solvent cleaners, abrasive pads and bleach. Do not machine wash the shoe or leave it submerged in cleaning water.

Drying the pair

Let the shoe dry naturally with the laces loosened. Keep it away from direct heat, including heated drying racks. Make sure the interior has dried before storing the pair in a box; a dry outside does not establish that the lining is dry.

Sizing and selection

Assess fit with both shoes on and the socks intended for running. A color option does not change the EU size system. This guide has no color-specific size recommendation, width measurement or promise that the fit matches another brand.
